Work Experience

Freelance Developer

Jan 2023 – Present, Remote

- Developed 3+ full-stack websites for clients in e-commerce and personal branding using Next.js, Sanity, and TailwindCSS, achieving client satisfaction.

- Designed responsive, accessible UIs with TailwindCSS v4, reducing mobile load times by 25%.
- Integrated Firebase authentication and Stripe payments, enabling secure user access and seamless transactions.

Founder, StartupFounder

Jun 2024 – Present, Lagos, Nigeria

- Built and launched a platform connecting developers with startup founders using Next.js 15, Sanity CMS, and Sentry for error tracking.
- Designed a scalable database and dashboard, growing the platform to 10+ active users in 2 months through organic marketing.
- Implemented React 19 for enhanced UI performance, improving user engagement by 20%.

Projects

📌 **robinsonhonour.me** – Personal Portfolio

- Fully responsive portfolio with contact form (Next.js + Tailwind)

- Optimized for SEO with structured metadata and sitemap

📌 **Silent Alarm App** *(React Native + Firebase)*

- Panic alarm app for quick, silent alerts

- Features include SMS alerts, GPS tracking, and Stripe monetization

📌 **HydraMind** *(Hackathon Project)*

- AI-powered hydration tracker

- Worked on frontend and authentication (Google login, better-auth)

Education

Self-Taught Developer

High School: Hebron College International School
Ongoing – Project-based learning, documentation, and real-world builds

Certifications

- JavaScript Algorithms and Data Structures – Udemy *(2024)*
- Responsive Web Design – freeCodeCamp, Udemy *(2024)*
- Full-Stack Software Engineer - Udemy (2024)
